

Gluasad Comhla

Gluasad Comhla is a partnership project run by dedicated staff based within the energy team at [Tighean Innse Gall](#) and [Lewis Citizens Advice Service](#). The innovative project has been successful in being supported with funding from the Scottish Government through the [European Social Fund - Aspiring Communities Fund](#). This exciting project has brought together a number of agencies, from [Langabhat Medical Practice](#) and [NHS Western Isles](#), [The Foyer](#), [Western Isles Association for Mental Health](#) and [The Shed](#) to reach people who have long-term health conditions and whose health is being affected by living in a cold or damp home.

The project aims to co-ordinate a range of services which will make their home safer and more affordably warm by working with colleagues in GP practices who will refer interested patients, living with long term health conditions.

The project aims

- to improve home insulation,
- help clients to understand their heating controls
- support clients to switch energy supplier
- access charitable funding to pay for energy efficient appliances
- maximise client income and address fuel debt problems,
- to liaise with Home Energy Scotland staff for heating upgrades where appropriate.
